Re: **Testimonial for Scheduling Services
Precision Scheduling**

To whom it may concern:

Precision Scheduling provided scheduling services for our GM M5 Arlington Productivity Improvement Project over the course of almost 3 years. Our scheduler, Sergio Menchaca, spent the first 18 months of the project working in our site office developing and modifying our master project schedule. The project was a complex build with many auxiliary buildings that were required to complete to make way for the main project scope. As designs changed frequently, the schedule was constantly reworked to represent the changing scope.

Sergio is a master in Primavera's P6 software, providing our team with all the necessary information to make intelligent decisions. He frequently challenged the team on logic issues, duration adjustments, and receiving accurate status updates.

During the last half of the project we worked remotely with Sergio and in a testament to his work ethic, he was always available day and night to send reports and answer questions. The overall service we received from Precision Scheduling was exceptional.

In closing, Barton Malow recommends Precision Scheduling to future clients looking for a very capable and professional firm.

Thank you.

Sincerely,

Josiah Goins
Sr. Project Manager
